

Scope of Work Document

Project Title:

Flipkart E-Commerce Chatbot

Prepared For:

Flipkart

Stakeholders:

Tony Sharma - Engineering Lead

Peter Pandey - AI Engineer

Natasha Reddy - Product Manager

Lauki Lal - Data Engineer

Project Overview:

The project aims to develop and deploy an AI-powered chatbot to enhance the user experience for Flipkart's e-commerce platform. The chatbot will assist users with frequently asked questions (FAQs) and product inquiries, driving engagement and customer satisfaction.

Project Phases and Deliverables:

Phase 1: Chatbot Development in Streamlit

Objective: Build a chatbot in Streamlit with core functionalities for FAQs and product inquiries.

Deliverables:

1. FAQ Data Ingestion into Chromadb – Efficient ingestion and vectorization of frequently asked questions into the Chromadb vector database.

2. Streamlit Chatbot Frontend – Develop an interactive and user-friendly chatbot interface using Streamlit.

3. Route Support:

- FAQs – The chatbot must retrieve answers from the FAQ database.
- Product Inquiries – Product and pricing information will be pulled from an SQLite database.

Tech Stack:

- Language Model: LLama3.3 LLM
- Frontend: Streamlit

- Database: Chromadb (vector database) and SQLite (product and pricing storage)
- Routing: Semantic router

Phase 2: Full Integration with Flipkart Website

Objective: Expand the chatbot's capabilities and fully integrate it into the Flipkart website.

Deliverables:

1. Full-scale Chatbot Deployment – Transition from Streamlit to a production environment suitable for large-scale user interactions.
2. Website Integration – Seamless integration of the chatbot into the Flipkart website to support live customer queries.
3. Performance Optimization and Testing – Ensure the chatbot operates with high accuracy and minimal latency.

Project Timeline:

Total Duration Phase 1: 5 Weeks

Success Criteria:

Fully functional chatbot capable of handling FAQs and product inquiries.
Accurate and efficient data ingestion into Chromadb.
Smooth integration with Flipkart's website ensuring minimal downtime.

Approval:

This document serves as the official agreement for the scope of work and deliverables between Flipkart and the development team.
